### **Cosmological constant - Wikipedia**

"Dark Energy" is revealed. Dark Energy is "Vector Energy" =  $mcV = cP$ . Physicists consider energy to be a scalar, not a vector! The "Dark Energy" is a three.

### **Dark matter exists: Observations disprove alternate explanations**

Abstract: The nature of dark matter (DM) and dark energy (DE) which is .. i.e. CP . Large CP violations due from the standard model would induce, .. vector sum of the imbalance in the transverse momentum plane recoils a Standard Model.

## **Simplified Dark Matter Models**

On the other hand, the holographic dark energy (HDE) approach .. are the energy-momentum tensors for matter distribution and scalar field.

## **Dark matter - Wikipedia**

Dark matter is a form of matter that is thought to account for approximately 85% of the matter in In the standard Lambda-CDM model of cosmology, the total mass -energy of the universe contains 5% ordinary .. "inward" under gravity, and cannot lose it any other way, will heat up and increase velocity and momentum. Dark.

## **Search for WISPs gains momentum - CERN Courier**

In cosmology, the cosmological constant is the energy density of space, or vacuum energy, that arises in Albert Einstein's field equations of general relativity . It is closely associated to the concepts of dark energy and quintessence. . tensor T describes the energy and momentum density and flux of the matter in that point.

Thus there can be no such frame. Tehey is teh lying about teh datumz and using teh algerithms to manipoolateumate it. CP is an edge to our visible via light universe. Bibcode:PhRvL. InSwiss astrophysicist Fritz Zwickywho studied galaxy cP while working at the California Institute of Technology, made a similar inference. The LUX experiment, which has found zilch in the way of Dark Matter, is a liquid based experiment, The DAMA, Cogent, et al, experiments is Dark Energy involve cryogenically frozen crystals with the constituent atoms and nucleons in the lowest energy state, and almost absolutely motionless, always find evidence of Dark Matter. You vastly underestimate the bias against astrophysical DM candidates and the weakness of the theoretical arguments and assumptions that provide a cover for this bias.

I get interested enough I might take the trouble, but it's a

complex calculation and I just don't care .
