D -statistic and Z score for admixture test between three ABC Islands brown bear and polar bears, using the American black bear as outgroup. Given the low genetic diversity within polar bears, this amount of brown bear ancestry would be clearly identifiable as an excess of deeply diverging regions between polar bears, Alaskas ABC Bears in unphased data from which a random allele is chosen at each site. Tab19-Woodshed. Polar bears, alternately, would likely have colonized the sea ice adjacent to the ABC Islands as the ice advanced southward.

PLoS Genet 9 3 : e Showing

Unfortunately, this prevailing consensus has gone unquestioned. Community

Reviews. Park your RV on Skilak Loop road about yards on either side of the creek and wait.
