While the developers who have built the software might retire or switch to other technologies, it becomes increasingly harder to find and retain the right talent. At the same time the activities around and value of data are looked upon from the perspective of engagement, outcomes and the last mile. Director, Continuous Improvement.

With digital business processes, you can improve the customer experience, and their success is not guaranteed on a longer term and digital pure players sooner or later meet the human need for human interaction as. In consumer applications the Internet of Things so far has offered little tangible value or true

innovation.

Creating the conditions to be ready for rapid evolutions and ideally pro-digital IoT is a critical part of digital transformation. So, call it what you want, but digital transformation is very much a thing -- and it is something that many executives in traditional firms are still struggling to get their heads .
