Every person on this planet is meant to be individual. When applied, these general principles lead to both a requirement for informed consent of human research subjects and a requirement for a careful assessment of risks and benefits before proceeding with research.

Yes,cloningcansavepeopleslives. The Creator says the lab's director is on board, and is skilled in the handling of human eggs and the IVF manipulations that closely resemble those used in cloning. It is now more important than ever to ban human cloning.

OurPlanet.Scientificresearchmustnotonlyrefrainfromharmingthoseinv

however much or little one's genotype actually shapes one's natural capacities, it could mean a great deal to an individual's experience of life and the expectations that those who cloned him or her might. Living up to parental hopes and expectations is frequently a burden for children; it could be a far greater burden for a cloned individual.
